

About the Project

Asad Raza is an artist who creates artworks as “zones of activity”. In this project, he has worked with biologists, environmental scientists, gardeners, architects and other artists to fill a building with almost 300 tonnes of soil! The artist wants to bring our attention to the incredible array of life that’s right beneath our feet.

A Recipe for Healthy Soil

2 weeks of fruit & veg scraps from a 4-person household
25kg bag of animal manure
1 barrow-load of dry autumn leaves
½ bale of straw
½ barrow of sand
1 bucket of clay dust
20 litres of water

1. Combine all ingredients except water into a pile (not in full sun).
2. Sprinkle with 1 litre of water.
3. Turn ingredients together with a garden fork.
4. Cover with hessian sacks.
5. Sprinkle with 1 litre of water once a month.
6. Turn ingredients once a month.
7. After 6 months, you should have 1 barrow of healthy soil ready for growing in!
